

The New MSI Is Here

Harris Local Government is pleased to announce the newest version of MSI is ready.

The new version of MSI (MSI 10) combines the same familiar shortcuts and keystroke patterns you know with sought-after modern capabilities and functions you expect. Additionally, this investment in the MSI software will make it easier to add future improvements and advancements.

Some of the advanced features MSI 10 adopts include security features like Single Sign-On, role-based access, and cloud enabled deployment. You can also expect productivity enhancements like full screen/multi-window display, intuitive search functions, and advanced data

Features

Cloud-based Deployment

Access your MSI software anytime and anywhere you have a secure internet connection.

Single Sign On (SSO)

Sign in once to access every module and function in the MSI software suite while reducing password hacking vulnerabilities.

Full Screen Display

Leverage full screen display and multiple monitors to maximize your productivity.

Advanced Search Options

Find important documents and records quickly using the advanced search function.

Document Management

Allows storage of digital documents associated with a specific account or employee.

Custom Dashboards

Configure custom dashboards to report on key metrics and export data to common formats.
