

*MSI is a scalable software solution designed with and built for government organizations in Illinois, Wisconsin, and Minnesota. For over 30 years we've worked directly with local municipalities to create a specialized, feature-rich financial management product built specifically to meet local government's needs.*

## Why Choose MSI?

### Comprehensive Fund Accounting Software

MSI is a full financial management suite featuring over 15 modules and integrations that address the specific needs of local governments. Including solutions for:

- Financial Management
- Billing & Revenue
- Human Resources & Payroll

### Dedicated Support

Our support team is located in IL where we assist our customers to get the most out of their MSI software. Our dedicated specialists provide expert support services and offer both onsite and remote training.

### Company Stability

Harris' commitment to our customers is backed by our **Software For Life** policy. You will receive the same level of service and support for that solution as long as you use it. You can take comfort in knowing Harris has never discontinued support of an in-service product, ever.

### Proactive Enhancements & Feature Updates

We work directly with our customers to add requested features and critical updates to MSI. In fact, in 2021 we launched a new modernized and feature rich version of MSI. Learn more about the new MSI by visiting: [msi.harrislocalgov.com](https://msi.harrislocalgov.com)

## Features

### Modular

MSI is built to scale with your organization's needs in mind. Start with the essential modules and add more as your organization grows.

### Fully Integrated

MSI modules communicate with each other to make sure your data is updated and valid. This eliminates duplicate entry.

### Security Roles

MSI allows you to customize access to certain modules, accounts, and records at the role level as well as for individual contributors.

### Audit Trails

MSI automatically saves relevant data to make sure there is a clear audit trail for each account, record, and transaction. Actively prepare for a potential audit at all times.
